

NEET Biology – Chapter 2 PYQs

Sexual Reproduction in Flowering Plants | Practice Module (25 Questions)

Q1. The structure that bears microsporangia in angiosperms is

- A. Anther
- B. Filament
- C. Stigma
- D. Style

Q2. The innermost layer of anther wall is

- A. Endothecium
- B. Tapetum
- C. Epidermis
- D. Middle layers

Q3. Pollen mother cells undergo

- A. Mitosis
- B. Meiosis
- C. Amitosis
- D. Binary fission

Q4. Number of nuclei in a typical embryo sac is

- A. 4
- B. 6
- C. 8
- D. 16

Q5. The opening of ovule through which pollen tube enters is

- A. Micropyle
- B. Chalaza
- C. Hilum
- D. Funicle

Q6. Pollination by insects is termed

- A. Anemophily
- B. Hydrophily
- C. Entomophily
- D. Zoophily

Q7. Double fertilization involves

- A. One fusion
- B. Two fusions
- C. Three fusions
- D. No fusion

Q8. The product of triple fusion is

- A. Zygote
- B. Embryo
- C. Endosperm
- D. Ovule

Q9. Exine of pollen grain is made of

- A. Cellulose
- B. Pectin
- C. Sporopollenin
- D. Lignin

Q10. Stigma is receptive to pollen due to

- A. Dry surface
- B. Sticky surface
- C. Hard surface
- D. Rough surface

Q11. Male gametes in angiosperms are produced by

- A. Pollen tube
- B. Generative cell
- C. Tube cell
- D. Synergids

Q12. The edible part of coconut is

- A. Pericarp
- B. Endosperm
- C. Embryo
- D. Seed coat

Q13. Megaspore mother cell undergoes

- A. Mitosis
- B. Meiosis
- C. Binary fission
- D. Budding

Q14. Functional megaspore in most angiosperms is

- A. One
- B. Two
- C. Three
- D. Four

Q15. The female gametophyte is located in

- A. Anther
- B. Ovule

- C. Stigma
- D. Style

Q16. The pollen tube releases gametes into

- A. Egg cell
- B. Synergids
- C. Antipodals
- D. Central cell

Q17. Zygote develops into

- A. Endosperm
- B. Embryo
- C. Seed coat
- D. Ovule

Q18. Endosperm provides

- A. Protection
- B. Nutrition
- C. Pollination
- D. Fertilization

Q19. Autogamy refers to

- A. Cross pollination
- B. Self pollination
- C. Wind pollination
- D. Water pollination

Q20. Xenogamy involves

- A. Same plant
- B. Different plant
- C. Same flower
- D. Same ovule

Q21. Agents of pollination include

- A. Only wind
- B. Only insects
- C. Wind, water, animals
- D. Only animals

Q22. Seed formation occurs after

- A. Pollination
- B. Fertilization
- C. Germination
- D. Dispersal

Q23. Fruit develops from

- A. Ovule
- B. Ovary
- C. Endosperm
- D. Embryo

Q24. The outer layer of ovule becomes

- A. Endosperm
- B. Seed coat
- C. Embryo
- D. Fruit

Q25. Assertion: Double fertilization is unique to angiosperms Reason: It involves two fusions

- A. Both true and R explains A
- B. Both true but R not explanation
- C. A true R false
- D. Both false

Answer Key

Q1: A
Q2: B
Q3: B
Q4: C
Q5: A
Q6: C
Q7: B
Q8: C
Q9: C
Q10: B
Q11: B
Q12: B
Q13: B
Q14: A
Q15: B
Q16: B
Q17: B
Q18: B
Q19: B
Q20: B
Q21: C
Q22: B
Q23: B
Q24: B
Q25: A

Detailed Solutions

Q1: A

Anther contains microsporangia where pollen grains are formed.

Q2: B

Tapetum provides nourishment to developing microspores.

Q3: B

PMC undergo meiosis to form haploid microspores.

Q4: C

A mature embryo sac is 8-nucleate, 7-celled.

Q5: A

Pollen tube usually enters through micropyle.

Q6: C

Insect pollination is called entomophily.

Q7: B

One syngamy and one triple fusion occur.

Q8: C

Triple fusion forms primary endosperm nucleus.

Q9: C

Sporopollenin is highly resistant material.

Q10: B

Sticky surface helps pollen adhesion.

Q11: B

Generative cell divides to form two male gametes.

Q12: B

White kernel is endosperm.

Q13: B

MMC undergoes meiosis to form megaspores.

Q14: A

Only one megaspore is functional.

Q15: B

Embryo sac lies inside ovule.

Q16: B

It enters synergid through filiform apparatus.

Q17: B

Zygote forms embryo.

Q18: B

Endosperm nourishes embryo.

Q19: B

Autogamy is self-pollination within same flower.

Q20: B

Xenogamy is pollination between different plants.

Q21: C

Various agents help pollination.

Q22: B

Seed forms after fertilization.

Q23: B

Ovary develops into fruit.

Q24: B

Integuments form seed coat.

Q25: A

Double fertilization includes syngamy and triple fusion.
